

MILESTONE
ENVIRONMENTAL SERVICES

See waste from a new perspective

Advance net-zero initiatives and cost-effectively manage energy waste. A clear win-win.

SOUTH TEXAS

Milestone is your resource for fast, safe, responsible, and convenient energy waste sequestration. Our proprietary slurry injection process permanently locks your waste away thousands of feet below the water table, which reduces your liability and furthers your carbon-reduction goals – at about the same cost as outdated, risky, high-emitting methods. We're close by. We turn trucks quickly. We're better for your business in every way.

WE ACCEPT THE FOLLOWING ENERGY WASTE:

- + Drilling Fluids (Water-based and Oil-based)
- + Flowback
- + Produced Saltwater
- + Tank Bottoms
- + Oily/Dirty Water

OTHER SERVICES:

- + Truck and Frac Tank Full-Service Washouts
- + Multiple Covered Washout Bays
